

CI-CD Pipeline with Jenkins

1. Create a CI/CD for Jenkins for node js application & Deploy the application
Eg: <https://blog.couchbase.com/create-continuous-deployment-pipeline-nodejs-jenkins/>
<https://jenkins.io/doc/tutorials/build-a-node-js-and-react-app-with-npm/>

note: The Delivery of the application should be done from Shell Script/Ansible
2. Create CI/CD for Jenkins for .net applications
<https://www.codeproject.com/Articles/878203/Integrate-Jenkins-with-MSBuild-and-NuGet>

note: The Delivery of the application should be done from Batch Script/Ansible
3. Create the CI Job for the application As mentioned in
https://github.com/codepath/android_guides/wiki/Building-Gradle-Projects-with-Jenkins-CI
4. Create the CI/CD for PHP Application
<https://alexbilbie.com/2015/04/setting-up-jenkins/>
- 5.
